## Body Sculpting & Cellulite Reduction Laser

### Accent Laser

The Accent is a non-ablative, non-invasive laser that uses two types of radiofrequency technology. The treatment consists of using a bipolar handpiece that penetrates about 6mm in the skin, followed by the unipolar handpiece which penetrates about 20 mm into the skin to breakdown the adipose tissue.

Since Dr. Patel and her staff are improving their technique, we are still offering the original discounted prices. This will be the last time to take advantage of these great prices. Jump start that New Years Resolution with an Accent Treatment!

### Prices for Body Areas

#### Abdomen
